

# Northwest Advantages

**We are the leader in the design and manufacture of premium foot orthotics.**

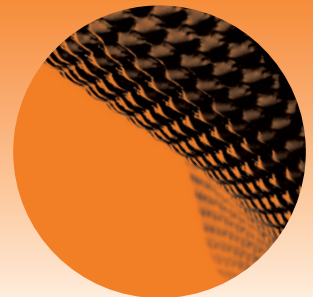

## **Prescribed By Leading Healthcare Professionals**

Healthcare professionals who prescribe our orthotics are making a conscious choice to provide the BEST for their patients, NOT the least expensive.

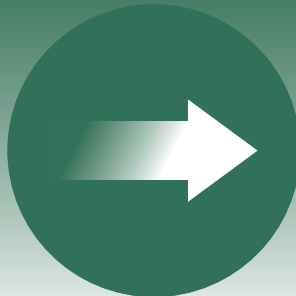

## **Revolutionary Materials**

Making the best performing product means challenging the status quo. That's why we develop proprietary materials that are thinner, lighter and stronger as the foundation of our orthotics. We craft orthotics that will fit any shoe.

## **Fast Turnaround**

We consistently ship orders for custom orthotics in five business days. Fast and reliable turnaround is important to us because we know it's important to you.

## **We Know Biomechanics**

When it comes to biomechanics, we've got you covered. Biomechanical principles are fundamental to every product, material and training program at Northwest. It's what makes our shape unique and why our orthotics are so effective.

## **50+ Years of Experience**

Creating world-class custom orthotics is an art and science requiring talented and experienced craftspeople. Our employees average 15 years of experience and nearly 1/3 have been with us for 20+ years. We're passionate about treating foot pain.

## **A Dedication to Innovation**

New ideas, processes and technologies are our passion - we have over 40 US patents to prove it. Innovating requires investment and isn't always easy, but products with the latest technology, materials and unrivaled performance are what you need.
